

AI Cleanup & Credits

When to reach for AI, and exactly how credits work.

01 When to use AI

Most art doesn't need it — B/W, Color, Layers, Depth, and Dither are all free and local. Use AI when a photo is too messy for a clean trace: AI redraws your exact image into clean, traceable art (B/W or a few flat colors) while keeping the composition. You can also generate an image from a text prompt.

02 What a generation costs

Generating on a **new image = 1 credit**. Not happy? Regenerating the **same image** — different style, dials, or a tweak — is just **0.2 credit** each. So you iterate cheaply and only pay full price once per image. A different image is a fresh 1-credit generation.

03 Free previews

Every account gets **3 free AI previews** (watermarked) so you can try it. Add credits to remove the watermark and get clean, vector-ready output.

04 Getting credits

Pro includes 40 credits/month. Or buy one-time credit packs (20/\$8, 50/\$18, 120/\$36) with no subscription — they don't expire while your account is active.

05 After AI

The AI result is traced locally into vectors (free), or you can keep it as a clean PNG. Then export like any other mode.

💡 Everything except AI is free with unlimited downloads — credits are only for AI cleanup and image-from-text.
